

HIT IT AND SPLIT IT!™

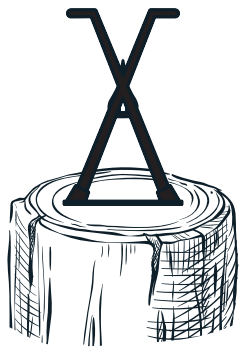

XTREME KINDLING CUTTER

Hit it and Split it!™ The Xtreme Kindling Cutter by Dragonfire® instantly splits logs into kindling for the perfect fire. Please follow these important instructions when using your Xtreme Kindling Cutter.

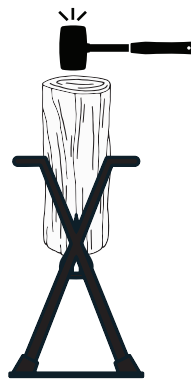

IMPORTANT SAFETY INSTRUCTIONS

- When handling Xtreme Kindling Cutter wear gloves and protective eyewear.
- Only use Xtreme Kindling Cutter on a level surface.
- Never place Xtreme Kindling Cutter on another surface/base unless securely bolted. When bolting to a base, make sure the surface is level, and both sides are securely bolted. Bolt it to a heavy base, such as a tree stump, to prevent it from tipping over while in use.
- Xtreme Kindling Cutter is for adult use only and is unsafe for children.
- Avoid using excessive force when hitting kindling. The Xtreme Kindling Cutter is designed to easily split kindling and excessive force may cause injury.
- Ensure the circumference around the Xtreme Kindling Cutter is clear to protect from splintering debris.
- When handling the Xtreme Kindling Cutter stay an arm's length away from the splitter; do not look directly over the blade.
- Do not split logs that do not fit securely within the upper blade ring.
- Do not split logs any smaller than 1" in diameter.

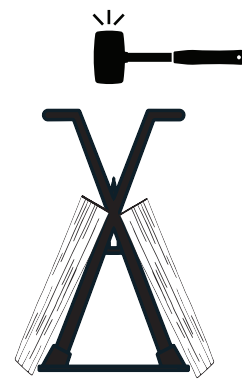

USE INSTRUCTIONS

Step 1: Place Xtreme Kindling Cutter on flat ground or bolt to a raised surface. For easiest use, bolt the Kindling Cutter to a stump.

Step 2: Position a piece of firewood at the center of the splitting wedge. The Xtreme Kindling Cutter accommodates 7" diameter logs.

Step 3: Using a blunt object, such as a hammer or mallet, hit the log with sufficient force until it splits into two. Multiple strikes may be necessary.
